## Web Based Content Management System

Content Xpress from 3 Legs Ltd has been developed to give you the flexibility to maintain your website via an easy to use web based interface - with no technical skills required.

Keeping a website up to date and relevant to your customers can be the difference between winning or losing a sales lead. Our content management system puts you in control of your website. Using Content Xpress you can choose just how much of your website is under content management. A range of pre-defined modules allows you to quickly add specific functionality to your website.

- Web Based Interface
- Subscription service
- Add to any website
- A range of modules
- Optional custom modules
- Make updates 24/7
- Use any computer

### Available Pre-Defined Modules

Web Pages

News/Press Releases

Blog

Events Calendar

Video Gallery

Audio Gallery

Photo Gallery

## Available Modules

### Web Pages

Our web pages module makes it quick and easy to edit an individual page on your website. The HTML editor allows you to style text, insert images and link to documents, files and other pages.

### News

The news module allows you to maintain a list of news items on your website. There is also a RSS feed option to allow users of your website to subscribe to your press releases.

### Blog

The blog module allows you to maintain a simple blog. Each blog entry can contain a photo, text, audio or video clip, pdf document, links to another page or website and a mini photo gallery.

### Events Calendar

The Events Calendar module features a page with a calendar. Selecting a day will show a summary list of events on that day. You can then click the event to bring up more information about that event.

### Photo Gallery

The photo gallery module allows you to maintain a photo gallery on your website. The gallery consists of thumbnail images and their larger versions. Each photo has its own name and description.

### Video Gallery

The video gallery module allows you to maintain a video gallery on your website. The gallery consists of a selection of videos. Selecting a video will playback the selected video.

### Audio Gallery

The audio gallery module allows you to maintain a collection of audio clips on your website. The gallery consists of a selection of audio files. Selecting a video will playback the selected audio.

### Document Archive

The Document Archive module allows you create a page of documents that users can download. You can create either a single page or multiple pages with an a-z index.

## Custom Modules

Using the power of our CMS we can create custom CMS modules tailored to your websites specific data requirements.

## Pricing

As a web based software service there is an initial setup cost and then a monthly service fee starting from £15/month. Since no two websites are the same and the number of modules required is different please contact us with your requirements for a custom quote.

All prices exclude VAT. E&OE
